

The Village of Marion Will be taking the Village Water tower out of service on Sunday 7/29/2018. The work will provide inspections and cleaning of our potable water storage tank over the next week or two, cleaning of sediment, as well as a condition assessment. During this maintenance procedure you may notice a few hydrants around town running with a pressure relief valve on them. This is done to maintain Village water pressure at or above what is supplied during normal water tower conditions. If you should have any Question please feel free to contact the village Of Marion at 231-743-6801.
